# Leonardo Marzeuski

Fullstack Developer | React | Angular | Vue | Node.js | Java |
TypeScript | PostgreSQL
São Paulo, Brazil

## Summary

Fullstack developer with solid experience in React, React Native
and Node.js, specializing in creating dynamic interfaces and efficient
back-end services. I work in the development of modern applications
using Server Components, state management with Zustand, and
implementation of RESTful APIs with Node.js and PostgreSQL.
Experience with Next.js for hybrid rendering (SSR/SSG) and
performance optimization.

I have experience in agile environments (Scrum/Kanban),
contributing to code review, writing automated tests (Jest, React
Testing Library) and technical documentation. Domain of Git for
versioning and flow of merge requests, as well as responsiveness
and performance optimization practices. Familiarity with CI/CD
and DevOps practices to ensure the quality and scalability of
applications.

---

## Experience

### Meta
Full Stack Developer
June 2025 - Present (5 months)
São Paulo, Brasil

Development of scalable web applications and microservices for high-traffic
platforms, focusing on modern architectures and performance optimization.

Key responsibilities and achievements:

Development of responsive interfaces with Angular, Vue.js, React.js, and
TypeScript
Implementation of Server-Side Rendering (SSR) and Static Site Generation
(SSG) with Next.js and Nuxt.js
State management with Vuex, Pinia, Zustand, and Redux
Development of microservices with Node.js, Express, and Java Spring Boot

Implementation of RESTful APIs and GraphQL with Apollo Server

Database optimization with PostgreSQL, MongoDB, and Redis for caching

Implementation of automated tests with Jest, Vitest, JUnit, and Cypress

Configuration and deployment of CI/CD pipelines with GitHub Actions and Jenkins

Monitoring and observability with Prometheus, Grafana, and ELK Stack

Active participation in code reviews and architectural decisions

Application of design patterns (SOLID, DDD, Clean Architecture)

## bUP Hotels
Fullstack Developer React.js | Node.js | PostgreSQL
September 2023 - June 2025 (1 year 10 months)
Rio de Janeiro, Brasil

Development and maintenance of an administrative dashboard for hotel chains, ensuring efficiency, scalability, and service integration.

Key responsibilities and achievements:

Implementation of Server Components to improve dashboard performance and SEO

Development of responsive interfaces with TypeScript, React.js, and Material UI

Optimization of PostgreSQL queries to ensure performance in high-volume operations

Implementation of efficient state management with Zustand and Context API

Development of RESTful APIs with Node.js and Express

Implementation of automated tests with Jest, React Testing Library, and Supertest

Performance monitoring with Datadog and Sentry

Active participation in agile ceremonies (Scrum) and story refinement

## Pure Codex
Software Developer
July 2023 - January 2024 (7 months)
Polônia

Development of a mobile application for a Polish company partnered with Uber, focusing on user experience and performance.

Key responsibilities and achievements:

Development of a cross-platform application with React Native and React Native Web

Implementation of efficient state management with Zustand

Configuration and implementation of feature flags for controlled releases

Enhancement of the design system to ensure visual consistency and accessibility

Active participation in code reviews, refinements, and task planning

Daily communication in English with an international team

## TV TEM
Web Developer
January 2023 - August 2023 (8 months)
Sorocaba, São Paulo, Brasil

Development and maintenance of web applications and institutional websites for a Globo Network affiliate.

Key responsibilities and achievements:
Development of web applications with React.js, TypeScript, HTML5, and CSS3
Creation and maintenance of websites with WordPress
Implementation of new features and performance optimization with Webpack, Babel, and ESLint
Development of interactive landing pages with high conversion rates
System integration via RESTful APIs and GraphQL
Implementation of unit tests with Jest and Enzyme

## Dynamich tech
Software Engineer Intern
April 2022 - January 2023 (10 months)
São Paulo, Brasil

Web development focusing on responsive interfaces and API integration.

Key responsibilities and achievements:
Development of responsive interfaces with React.js, JavaScript, and TypeScript
Integration with RESTful APIs and GraphQL
Code optimization with Webpack and Babel
Implementation of automated tests with Jest and Enzyme
Version control with Git and GitHub Flow
Application of agile methodologies (Scrum, Kanban)

marzeforte
Manager
January 2018 - January 2023 (5 years 1 month)
Tapiraí, São Paulo, Brazil

People management in the production area in the packaging industry.
Responsible for the financial part of the company, including planning and cost control.
